Institutional Capacity Building on Renewable Energy Training

- a project overview
Workshop on Sustainable Energy Policies and Strategies

Held in Suva, Fiji, February 2002

- Identified institutional and human resources development as an area for immediate action

- Recommended that
  - A sustained mechanism for training on relevant energy issues be set up in the Pacific
  - Consideration be given to enhanced utilization of renewable energy
Project Goal

- To improve training on renewable energy in the Pacific Region
Project Strategy

- To identify continuous training needs on renewable energy in the Pacific
- To strengthen capacities of institutions in the Pacific to provide training on renewable energy
- To support the creation of a training mechanism by developing a consolidated Renewable Energy Training Strategy (RETS)
Implementation modality

- Managed by UNESCAP
- Implemented by Pacific Institutions
- Regional scope (Pacific Island Developing States)
Project components

1. Consultation (August 2002)
4. Draft Renewable Energy Training Strategy (RETS)
5. Consultation with governments, donors and regional organizations on the draft RETS
6. Finalization of RETS
The Renewable Energy Training Strategy

- Considerations on:
  - Training needs
  - Funding needs
  - Capacity-building needs

- Recommendations on:
  - Types of training to be provided
  - Institutional setup for provision of training
  - Capacity-building strategy
  - Donor strategy
